5218 SAS Hall
North Carolina State University
Raleigh, NC

Jonathan P Williams

PROFESSIONAL POSITIONS

| | |
|---|-------------|
| Assistant Professor (tenure-track) , Department of Statistics, NC State University | 2019 - |
| Research Collaborator , Mayo Clinic, Rochester, MN | 2017 - |
| Biostatistics Intern , Mayo Clinic, Rochester, MN | Summer 2016 |
| Statistical Consultant , Caster Concepts, Inc, Albion, MI | 2011 - 2014 |

EDUCATION

University of North Carolina, Chapel Hill, NC 2014 - 2019
Department of Statistics and Operations Research
PhD Statistics
Advisors: Dr. Jan Hannig (UNC) and Dr. Curtis Storlie (Mayo Clinic)

New York University, New York, NY 2012 - 2014
Courant Institute of Mathematical Sciences
MS Mathematics
Advisor: Dr. Ying Lu

Eastern Michigan University, Ypsilanti, MI 2008 - 2012
Honors College
BS double major in Economics and Mathematics, minor in Finance
Summa Cum Laude

PEER-REVIEWED PAPERS

1. **J P Williams**, D M Ommen, and J Hannig (2020+). Generalized fiducial factor: an alternative to the Bayes factor for forensic identification of source problems. *In review*.
2. S Nghiem, **J P Williams**, C Afoakwah, S K Ng, Q Huynh, and J Byrnes (2020+). The progression of a heart attack: A population-based longitudinal cohort study. *In review*.
3. **J P Williams**, Y Xie, and J Hannig (2019+). The EAS approach for graphical selection consistency in vector autoregression models. *In review*.
4. **J P Williams**, C B Storlie, T M Therneau, C R Jack Jr, and J Hannig (2020). A Bayesian approach to multi-state hidden Markov models: application to dementia progression. *Journal of the American Statistical Association* 115 (529) pp.16–31.
5. **J P Williams** and J Hannig (2019). Non-penalized variable selection in high-dimensional linear model settings via generalized fiducial inference. *The Annals of Statistics* 47 (3), pp.1723–1753.
6. E Sechi, E Shosha, **J P Williams**, S J Pittock, B G Weinshenker, B M Keegan, N L Zalewski, A S Lopez-Chiriboga, J Jitprapaikulsan, and E P Flanagan (2019). Aquaporin-4 and MOG autoantibody discovery in idiopathic transverse myelitis epidemiology. *Neurology* 93 (4), pp.e414–e420.
7. I Carmichael and **J P Williams** (2018). An exposition of the false confidence theorem. *Stat* 7 (1), pp.e201.
8. **J P Williams** and Y Lu (2015). Covariance Selection in the Linear Mixed Effect Model, *Journal of Machine Learning Research: Workshop and Conference Proceedings* 44, pp.277–291. (NIPS conference session)

PRESENTATIONS

1. The EAS approach for graphical selection consistency in vector autoregression models. *12th International Conference of the European Research Consortium for Informatics and Mathematics Working Group on Computational and Methodological Statistics (CMStatistics 2019)*, University of London, UK, December 2019.
2. The EAS approach for graphical selection consistency in vector autoregression models. *Sixth Bayesian, Fiducial, and Frequentist Conference on Model Uncertainty*, Duke University and SAMSI, May 2019.
3. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, University of Florida Gainesville, January 2019.
4. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, Iowa State University, January 2019.
5. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, University of Illinois Urbana–Champaign, December 2018.
6. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, North Carolina State University, December 2018.
7. Non-penalized variable selection via generalized fiducial inference. *Graduate Seminar*, Department of Statistics and Operations Research, UNC Chapel Hill, November 2018.
8. Non-penalized variable selection via generalized fiducial inference. *AISC 2018 International Conference on Advances in Interdisciplinary Statistics and Combinatorics*, UNC Greensboro, October 2018.
9. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *27th Nordic Conference in Mathematical Statistics*, Tartu, Estonia, June 2018.
10. A Bayesian approach to multi-state hidden Markov models: application to dementia progression. *Graduate Seminar*, Department of Statistics and Operations Research, UNC Chapel Hill, September 2017.
11. Non-penalized variable selection in high-dimensional linear model settings via generalized fiducial inference. *Graduate Seminar*, Department of Statistics and Operations Research, UNC Chapel Hill, February 2017.
12. A Bayesian approach to multi-state hidden Markov models: application to dementia progression. *Tea Time for Science*, Biomedical Statistics and Informatics, Health Sciences Research, Mayo Clinic, Rochester, MN, August 2016.

POSTER PRESENTATIONS

1. Non-penalized variable selection via generalized fiducial inference. *Recycled Poster Session of the North Carolina Chapter of the American Statistical Association*, SAS Campus, NC, September 2019.
2. Non-penalized variable selection via generalized fiducial inference. *Fifth Bayesian, Fiducial, and Frequentist Conference*, University of Michigan Ann Arbor, May 2018.
3. Generalized fiducial inference for high dimensional problems. *Invited Poster Session, Joint Statistical Meeting*, Baltimore, MD, July 2017.
4. Non-penalized variable selection in high-dimensional linear model settings via generalized fiducial inference. *Fourth Bayesian, Fiducial, and Frequentist Conference*, Harvard University, May 2017.
5. Covariance Selection in the Linear Mixed Effect Model. *Feature Extraction: Modern Questions and Challenges, NIPS*, Montreal, Canada, December 2015.

AWARDS

- Best poster award, *Recycled Poster Session of the NC ASA* September 2019
- Graduate Student Travel Grant – 1,000 USD Summer 2018
- Carl M. Erikson Mathematics Department Scholarship 2011 - 2012
- Regents Scholarship 2009 - 2012
- National Scholars Program Scholarship 2008 - 2012
- Leader Award Scholarship 2009 - 2011

PROFESSIONAL SERVICES

- Session Chair; Statistics for complex inference problems in data science. *12th International Conference of the European Research Consortium for Informatics and Mathematics Working Group on Computational and Methodological Statistics (CMStatistics 2019)*, University of London, UK, December 2019.
- Session Chair; Statistical Controversies in Forensic Evidence Interpretation. *International Chinese Statistical Association Conference*, Raleigh, NC, June 2019.
- Referee for *Journal of the American Statistical Association – Theory and Methods* 1 time
- Referee for *Biometrics* 1 time
- Referee for *Communications in Statistics – Theory and Methods* 1 time
- Referee for *Journal of Computational and Graphical Statistics* 1 time
- Referee for *Computers* 1 time
- Referee for *PLOS ONE* 1 time
- Referee for *Stat* 5 times
- Referee for *Journal of Statistical Planning and Inference* 1 time

COMPUTING SKILLS

R, Python, Julia, Linux, HPC environments

Examples of my written code/programs are available on my website

TEACHING

- Introduction to probability and distribution theory (undergraduate; ST 371 NCSU) Fall '20
- Linear models (graduate; ST 705 NCSU) Spring '20
- Fundamentals of statistical inference II (graduate; ST 502 NCSU) Fall '19
- STOR-BIOS grad student boot camp (real analysis section; UNC) Summer '17
- Introduction to statistics (first year undergraduate; STOR 155 UNC) Spring '16, Fall '16
- Tutor (economics and mathematics undergraduate; EMU) '09 - '12

OTHER ACTIVITIES

Fed Challenge Competition - Chicago Federal Reserve District 3/'08, 11/'08, 11/'09, 11/'10, 11/'11
